YUGOSLAVIA TO MAKE RADIOS, PRECISION INSTRUMENTS

NEW RADIO FACTORY TO BEGIN OPERATION -- Slovenski Porocevalec, No 12, 14 Jan 50

Large structures were begun in 1948 for the new radio, X-ray and electron-tube factory near Nis. The first workshop was completed recently and equipped with the necessary machinery. Only a few small tasks remain to be completed before work begins in the shop. Precision instruments, which the Cominform countries refused to send, were imported from other countries.

In 1949 another workshop, a designing office, laboratories, a storage room, and an industrial school for 300 students were started. The second workshop, which is yet to be built, will be used exclusively for the serial production of electron tubes and other radio parts. A temporary experimental workshop was erected to test the products that will be produced serially. The first type of electron tubes and the prototype of the X-ray apparatus was produced recently by the 350 skilled workers of the experimental workshop.

"ISKRA" PLANT TO MAKE PRECISION INSTRUMENTS -- Rad, No 29, 3 Feb 50

Kranj, 1 February -- In 1950 the "Iskra" Factory in Kranj will begin production of new electrical instruments for measuring weak electric current, and other precision instruments. The automobile industry will be supplied in 1950 with all the necessary electrical instruments for automobiles, including generators and regulators. The "Iskra" Factory will also produce permanent magnets.

The "Zelevnik" Factory, also in Kranj, will soon produce ball bearings for axles. Loudspeakers for movie theaters will also be produced in Kranj in 1950.
